

Exceptional VERSATILITY

Novabrik is a patented self-ventilated mortarless brick siding system. The high strength concrete bricks overlap and interlock to create a strong, water resistant brick veneer. The mortarless brick siding system includes components and accessories like corner blocks, starter strip and window sills to name a few.

Manufactured by:

Shaw Brick, PO Box 2130, Lantz, NS, Canada, B2S 3G4

- ⑨ Wainscot Cap

Mortarless **BRICK** Siding

Novabrik INSTALLATION

Novabrik can be installed on various types of structures:

- wood frame construction
- steel studs
- concrete or concrete block walls
- prefabricated steel buildings
- ICF systems.

Novabrik can be installed in freezing temperatures without the additional costs usually incurred in winter with conventional masonry installations.

Novabrik hangs on the wall, no brick ledge or foundation is required.

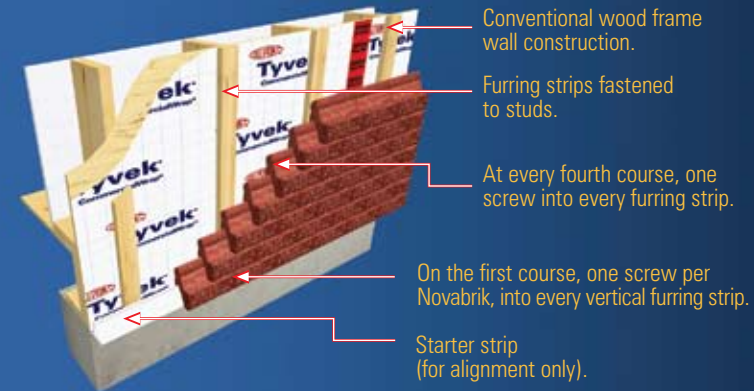

Novabrik

FLEXIBILITY

Whether you're renovating or building a new home, you can give your property a touch of class in no time thanks to Novabrik! Discover Novabrik— its revolutionary design makes for exceptionally easy installation and requires no mortar! As solid and durable as traditional brick, Novabrik is available in six appealing colours. And best of all, it's extremely affordable!

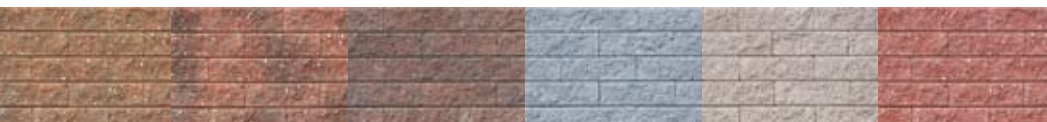

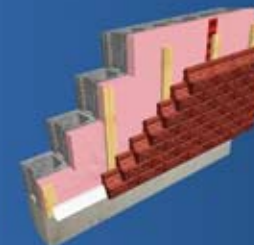

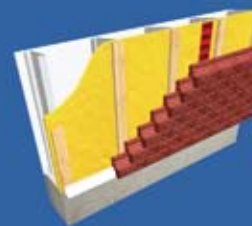

Enhance the value of your property without investing a fortune: use Novabrik, the brick that is easily installed!
