

CONCRETE ADHESIVE

Quikrete Concrete Bonding Adhesive

If you are looking for a premium all-purpose concrete adhesive, look no further than Quikrete Concrete Bonding Adhesive.

Quikrete permanently bonds new concrete, plaster, and stucco to existing concrete, plaster, and stucco. Eliminates the need for roughing the surface before the application. Exceeds the performance requirements of ASTM C 1059 Type I and II. This can be applied with a paintbrush or a roller as a bond coat, directly onto an old concrete surface. This popular concrete adhesive increases the bond strength with a new layer of concrete, sand mix or parging mix. Its like a concrete glue in that respect.

Can also be used as a concrete bonding agent

Quikrete Concrete Bonding Adhesive can also replace water in most cement-based mixes to act as a concrete bonding agent to increase adhesive strength, flexibility and durability. Quikrete is available in 1L and 4L formats.

Drop into a [Shaw Retail Centre](#) or one of our [independent dealers](#) to learn more about Quikrete

as a concrete adhesive or concrete bonding agent.
