

DEK-BLOCK

A faster and easier deck support solution

With no post holes to dig or concrete to pour, Dek-Block will make building your deck faster and easier.

Dek-Blocks come in two popular sizes to accommodate 4x4" or 6x6" square posts. Dek-Block also has a built-in drain hole to help reduce the risk of water build-up.

Dek-Block can also be used to support fences

Typically used as a sturdy deck footing, Dek-Block can also be used to build fence sections.

Drop into a [Shaw Retail Centre](#) or one of our [independent dealers](#) to learn more about making your deck or fence project be the best it can be with Dek-Block.
