Built for speed, safety and simplicity.

Shaw Brick's concrete Fire Block is designed for superior protection. This 190mm block, made with 61% solid concrete, offers 2-hour fire resistance, providing added security for what matters most.

INSTRUCTIONS/SUPPORT

[Fire Block Brochure](#)

SPECIFICATIONS

Under Sections 1.6 and 2.1 of the National Building Code: Equivalent Thickness of 190mm Concrete

Block at 61% solid = $.61 \times 190 = 116\text{mm}$

Fire Resistance Rating Using the Equivalent Thickness Calculation Method:

S or N Concrete: $\text{FRR} = 2 \text{ hr.} + (116-113)/(142-116) \times 1 \text{ hr.} = 2.04 \text{ hrs.}$

42 lbs per block

75 blocks/pallet

pallet weight: 3150lbs
