Top quality from Sandkuhl Clay Works.
Sandkuhl Flue Liners are designed with uniform dimensions and clean end cuts for optimal performance. Made from fire clay, they offer maximum heat resistance and less than 3% absorption, which helps prevent freeze-thaw damage. Their smooth, dense inner walls also reduce creosote build-up. These liners meet the ASTM C-315 Clay Flue Liner Standard.

All sizes are available in a standard 2′ length, with selected sizes offered in a shorter 1′ length.
