

LINEAR SMOOTH

A smaller, elongated Concrete Block

A newer addition to our Architectural Masonry Collection, Linear Smooth block has a long, contemporary, cut stone look with a smooth texture.

Linear Smooth is a durable, long-lasting concrete block building material that is sought after for both commercial and residential applications. It is available in three attractive designer colours: Wallace, Ivory and Steel Grey.

Made with stronger, greener Carbon Cure concrete

This concrete block product is made using the Carbon Cure concrete process, a revolutionary process that involves collecting waste CO2 emissions from industrial plants, transporting the gas to our concrete plant, and injecting it into our wet concrete mix to make them stronger and greener concrete products.

And, remember, this architectural block product is made right here in Atlantic Canada, so buying a Shaw Brick product is supporting our regional economy.

Drop into a [Shaw Retail Centre](#) or one of our [independent dealers](#) to see samples of these modern versions of cinder block products or to learn more about any product in the Shaw Masonry Collection.
