

NANTUCKET FIRE PIT KIT

StackStone elegance and warmth in the round

The Nantucket is a Shaw Brick Fire Pit Kit that features one of our perennial favourites - StackStone - in the popular Chamois Blend colour.

StackStone is a tapered garden stone system that features self-aligning landscape blocks with a structural interlock - even around tight curves. It ensures a perfect, durable, tight fit every time.

Everything you need to create your outdoor fire pit

The 60" diameter Nantucket Fire Pit Kit includes 44 StackStone units for the first two courses and 22 smooth-topped cap pieces for the top course. It also includes the heavy gauge 35" circular steel insert. Basically, everything you need (except the firewood), to create the Shaw Brick Fire Pit experience you've always wanted.

For expert help with your project, download installation instructions [here](#), or drop into one of the [Shaw Retail Centres](#) or one of our [independent dealers](#).
