

SQUARE CUT FLAGSTONE

Natural stone grain contrasted with clean cut edges

A sophisticated addition to your patio or garden, our Square Cut Flagstone from Shaw Brick includes the same nine colours or stone types as our Random Flagstone, but the natural stone is machine cut to a series of various rectangular shapes designed to lay together in a snug fashion. Each pallet is supplied with a mixture of sizes for this landscaping stone.

The resulting contrast of the natural stone grain with the clean-cut geometry creates a look of contemporary sophistication. Transform your landscape into a sleek and modern backyard haven with Square Cut Flagstone from Shaw Brick.

Natural stone patterns that are a feast for the eyes

Because it is extracted from quarries, our Square Cut Flagstone may have minor variations in the stone thickness. This does require extra time in laying them. We just wanted to flag that for you.

The end result is worth it, however, as there is nothing finer than the look and feel of a natural stone pathway or patio using Square Cut Flagstone from Shaw Brick.
